

The project summary

Group 10

The group members:

Khalid Bafaqih

Abdullah Baaqil

The contributions/responsibilities for each member:

We actually live at the same apartment, so everything we did, we did it together.

Summary of the issues/challenges that we faced:

we faced many problems in contacting with each other because everyone has his own schedule and we decided to do everything together, so we took a long time to understand each other and to find the right time to do the project. Thankfully, we started early, so we had enough time to do it properly.
