Group Project

The Individual Deliverable

The project was challenging for me, but it was interesting. It's my first time using those components, so this was the difficult part for me because I didn't know what to use and how to use them. Thankfully, my group mate and I contacted with each other everyday and we helped each other a lot. No one did anything without informing the other about what is he doing. We had some problems contacting with each other because of course we were not busy at the same time or available at the same time. There were times that I needed him, but he wasn't available, and the same thing for him, he needed my help many times, but I wasn't available, so there was some contacting issues. However, we tried our best to get along with each other, and thankfully we could.

I learned many things from this project. As I said above, it was my first time dealing with those components, and I can say that it was fun, and it was a fantastic experience. I felt amazing that what I imagined and pictured was totally done within my major. I felt proud that I chose this major. The project can be better if we open our budgets and work with better components.
